

```

! The Water Supply Index (WSI) for the SWP is the sum of the beginning of
months storages
! (BOM) for Lake Oroville (S6) and SWP-San Luis Reservoir (S12) and the
Forecast of Runoff
! for the Feather River.

! Forecast of Runoff for SWP is defined as: Feather River component of
the Sacramento
! River Index (SRI) - Sum of Oroville Lake Inflows (I6) since 1-OCT.

! Forecast of Feather River Runoff into Lake Oroville for REMAINDER of
WATER YEAR
